Extraction sockets	■	■
Periodontal defects		■
Implant dehiscence defects	■	■
Moderate localized ridge defects	■	■
Sinus floor augmentation	■	■
Implant site development	■	■
Coronal defects around immediate implants	Paste only	Gel only

DYNA BLAST™

Demineralized Bone Matrix with Cancellous Bone

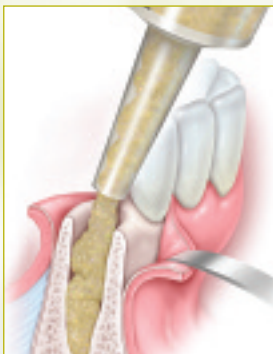

DynaBlast is a composite graft product that combines osteoinductive and osteoconductive elements in a proprietary, reverse phase medium. This powerful 2-in-1 solution combines:

- Demineralized bone, which stimulates new bone growth, and
- Cancellous chips, which provide a natural structural scaffold to encourage the attachment of osteogenic precursor cells

DYNABLAST PUTTY USED WITH AN IMPLANT WITH BUCCAL DEHISCENCE.

DYNAGRAFT•D™

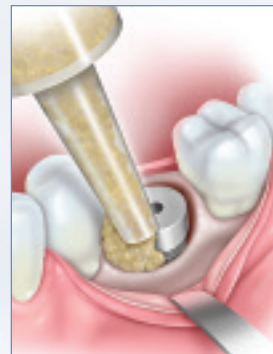

Osteoinductive Dental Bone Graft Substitute

DynaGraft•D is a unique graft substitute composed of a high content of human Demineralized Bone Matrix (DBM) in a reverse phase medium that is designed to stimulate natural bone formation. Available in putty or gel form, DynaGraft•D can be used either alone or as a bone graft extender indicated for augmentation or reconstructive treatment of the alveolar ridge.
